

## Combining Technologies for Cleaner Environments

### Why Choose Greentech?

Greentech's unique combination of pureAir technologies work together 24/7 to quickly reduce airborne volatile organic compounds (VOCs), allergens such as pollen and pet dander, and odors caused by mold, bacterial and other pollutants. And if all that clean isn't enough, it has also been proven to **inactivate 99.98% of SARS-CoV-2** from the air\*. Now employees and clientele can breathe a little easier.

### TESTIMONIAL

**"Both qualitatively and quantitatively, there was a measurable and sustained reduction of odor and TVOC (total Volatile Organic Compounds) levels when the ODODGard unit was functioning in comparison to the initial levels found inside the room and the adjacent hallway during the 14-day testing period. The overall sub-micron particle counts were reduced the most."**

Keith Roe, IAQS

\*Laboratory tests prove to inactivate over 99.98% of SARS-CoV2 in the air within ten air exchanges in a controlled environment.

## Introducing

pureAir  
**ActiveHEPA**   
WITH ODOGard®

The new standard in air purification is the innovative pureAir Active HEPA+. utilizing a powerful fusion of active and passive technologies. Backed by an **industry-best 10-year warranty**, it's the ideal solution for offices. And it's proven to inactivate 99.98% of the virus that causes COVID-19\*, something important to all of us these days.

pureAir Active HEPA+ Pro

Hunts Pathogens  
Captures Allergens  
Destroys Odors

- Reduce the risk of the spread of **COVID-19** and similar epidemics
- Reduces volatile organic compounds (VOCs), allergens such as pollen and pet dander, and other irritants
- **Improved indoor air quality** has been shown to improve cognitive performance and productivity

pureAir Active HEPA+ Room

pureAir  
**ActiveHEPA**   
WITH ODOGard®

Greentech's proven active technologies of Photocatalytic Oxidation (PCO) and Bipolar Ionization (BPI), which inactivate pathogens and odors at the source, combined with ODOGard®-coated HEPA filtration give you a purifier unlike any other. It's continuously cleaning your space, removing pollutants and destroying odors from the air and surfaces, 24/7, including the virus that causes COVID-19.

**Key Employer Benefits:**

- Reduce the risk of the spread of COVID-19 and similar epidemics.
- Create a cleaner environment by reducing VOCs, allergens and other irritants, improving comfort for employees and clientele.
- Improved indoor air quality has been shown to improve cognitive performance and productivity.

**HEPA FILTRATION:**

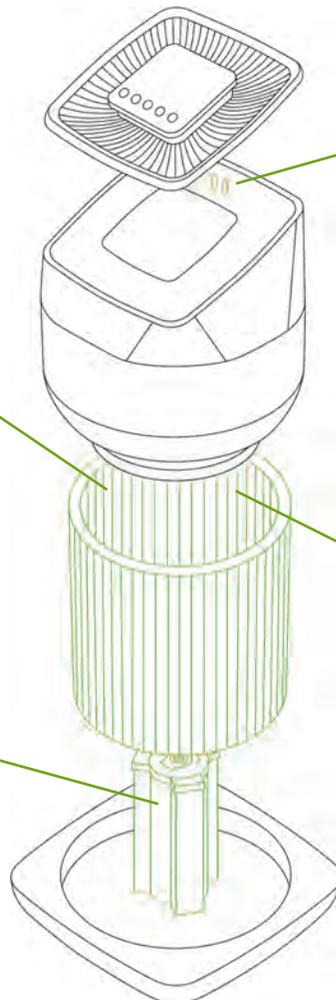

Traps and destroys odors along with allergens and other particulates.

**PHOTOCATALYTIC OXIDATION:**

Using a broad-spectrum UV light and moisture in the air, active oxidation products are created to seek out and inactivate pathogens at the source.

**BIPOLAR IONIZATION:**

Ionization brushes create a plasma of negative and positive charges to remove particles from the breathing space.

Active HEPA+ with ODOGard® is the only air purifier on the market that uses proprietary ODOGard® technology to quickly and permanently eliminate odors by bonding to odor molecules.

## The pureAir difference.

Because passive air purification simply doesn't work well enough on its own, Greentech's technology utilizes a proprietary Active Radiant Catalysis (ARC®) process as part of a multi-pronged assault on airborne pollutants, which has proven to be more effective in reducing pathogens from indoor environments. It's the same system used by NASA in the Space Station.

## Passive Purification V. Active Purification

Traditional passive air filters do not fully address the needs of indoor spaces. All indoor spaces face common environmental challenges, such as bacteria, viruses, mold, VOCs and odors, allergens, and particulates. Traditional air filters require air to pass through them to be cleaned, and these particles are often too small to be trapped, allowing them to pass freely into your space again.

## The Greentech Solution: Active Air Purification

Greentech's technology utilizes a multi-pronged approach combining photocatalytic oxidation, bipolar ionization, and our proprietary coated filtration, resulting in a more effective air purification. Advanced oxidation particles (AOPs) are propelled out into the space to hunt down pollutants and purify the air. These AOPs actively attack allergens and odors caused by bacteria, mold, VOCs and more before the air passes through the filter, providing a more thorough solution.

## Perfect Purifiers for Offices and Workspaces

**pureAir Active HEPA+ Pro**  
Combines active and passive technologies to create a unique air purification solution.

**pureAir Active HEPA+ Room**  
Combines active and passive technologies to create a unique air purification solution.

**pureAir 3000 MERV + Ozone**  
A unique air purification solution with active and passive technologies, with ozone..

**More Perfect Purifiers for  
Offices and Workspaces**

**pureAir 3000 MERV + No Ozone**

A unique air purification solution with active and passive technologies, no ozone.

**pureAir 750+Wall Mount**

Continuous air purification for spaces without HVAC duct access.

**pureAir SOLO**

A sleek, wearable air purifier that repels particles to create a clean breathing space.

**pureAir HVAC**

Installed into your existing ductwork, pureAir HVAC provides continuous air purification.

It's your air.  
Make it better.

### Why Choose Greentech?

For more than a decade, Greentech Environmental has been on a mission to use the latest technologies to universally solve indoor air problems, removing pollutants and improving spaces where we live, work and play. Indoor air can be filled with up to 10x more pollutants than the air we breathe outside. Allergens, bacteria and odors are just a few things flying about and ready to cause problems. Left untreated, these problems can cause absenteeism, reduced productivity and other issues.

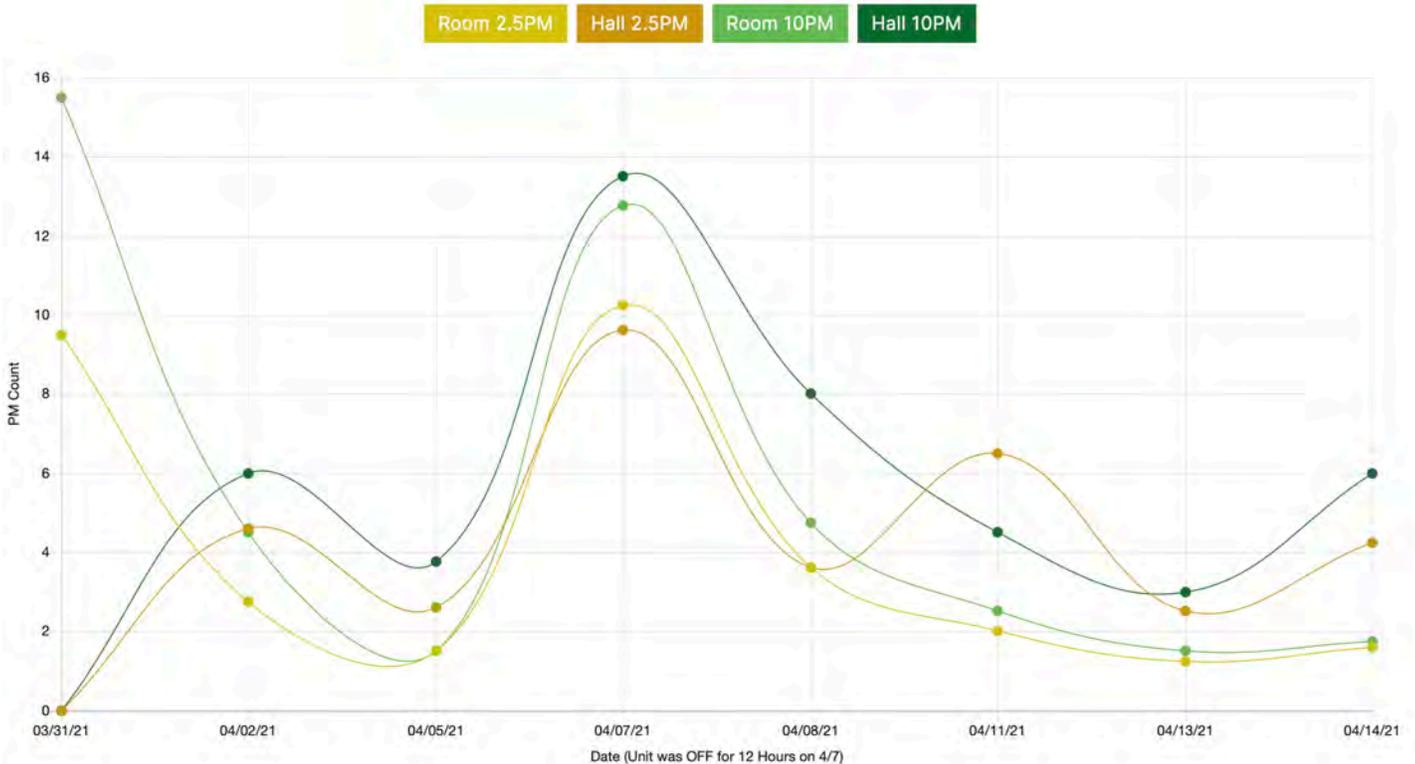

While outside air is out of your control, you have power to improve your indoor air wherever you are, from your vehicle, your home, or your office. Greentech's scalable pureAir air purifiers attack the sources of contaminants and pollution, continuously cleaning the air in your space to maintain a fresh environment. With our active air purification process and our proprietary coated filters, pureAir delivers the best in active and passive air purification.

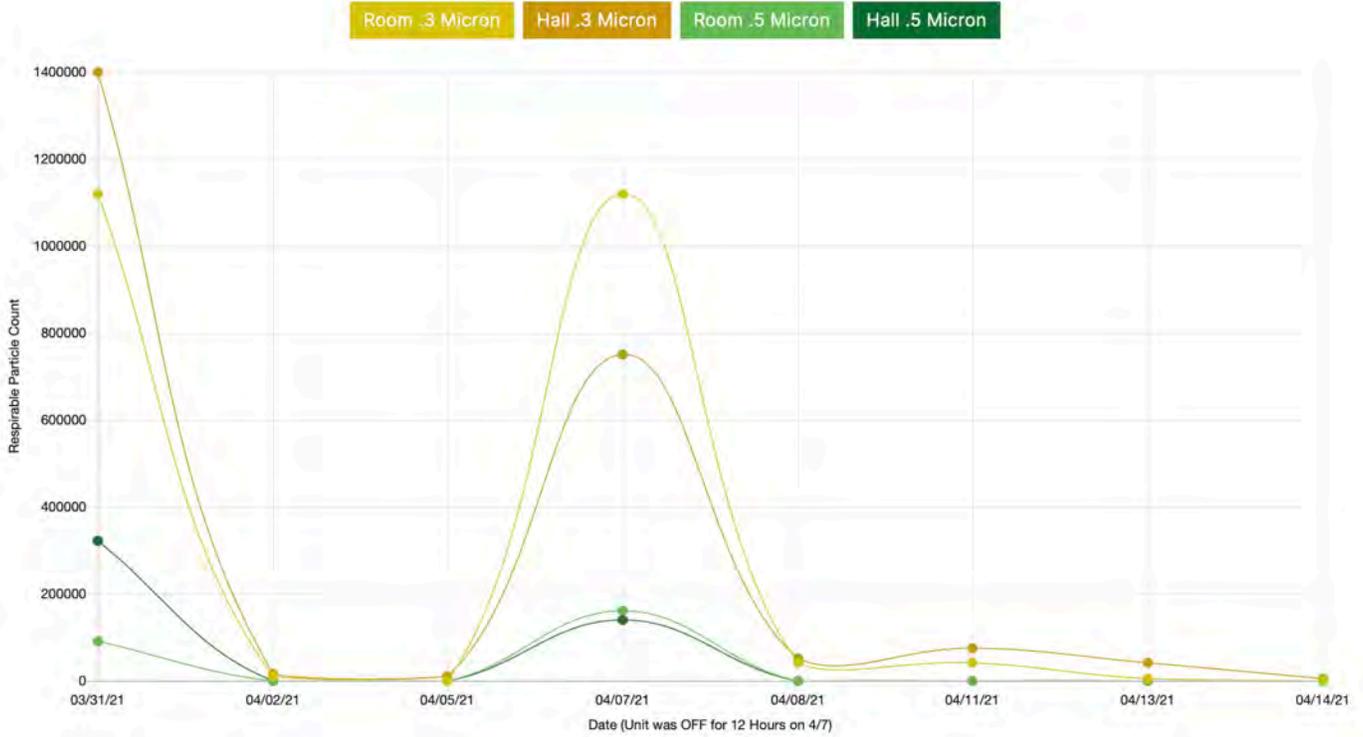

Test results  
don't lie.

Combining our PCO+BPI technology with a HEPA filter treated with ODOgard inactivated 99.98% of aerosolized SARS-CoV-2 in as little as 3 minutes and 20 seconds in a 13ft<sup>3</sup> class III biosafety cabinet.

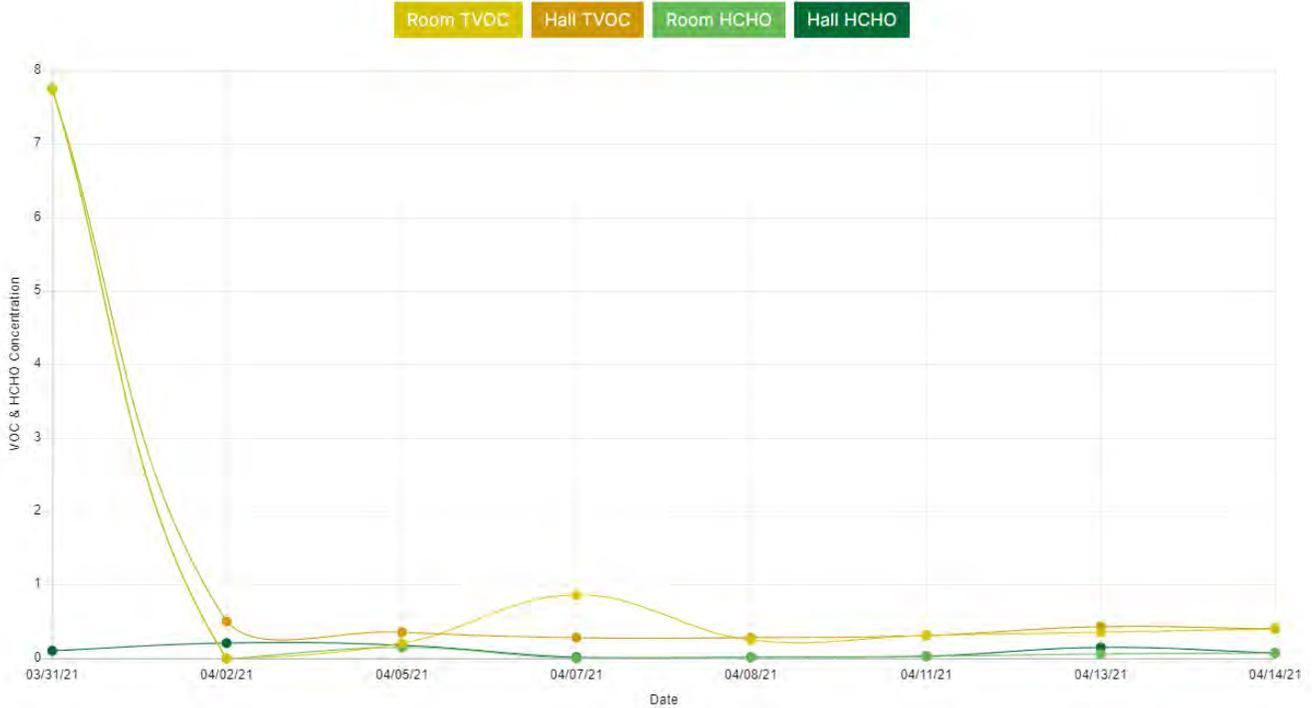

### Particulate Matter (PM)

**Respirable Particle Count**

**Volatile Organic Compound & Formaldehyde**

Extensive testing showed similar impressive results. TVOCs were reduced 99.9% and formaldehyde (HCHO) reduced to 33% of the original concentration. Both Total Particulate Matter (PM) and Respirable Particle Counts were significantly reduced during testing.
