

Whatever the needs are,  
**Greentech's suite of products**  
delivers for **transportation, education,**  
**long-term care, and more!**

### Active HEPA+

Combines active and passive technologies to create a unique air purification solution, perfect for removing odors.

### Ceiling Tile+

Providing continuous air purification from above. Mounts directly into a ceiling tile space.

### 1250+

Wall mounted unit that provides air purification for spaces without HVAC duct access.

### 750+ Mobile

Installed into your buses or shuttles to provide continuous air purification while on the move.

Transforming Air Purification

## Greentech air purifiers

use a powerful fusion of **Active and Passive technologies** with our revolutionary ODOGard-treated HEPA filtration.

### Active

PCO & BPI Distributes Purification Evenly Throughout the Space

### Passive

HEPA Filtration with ODOGard® Captures Particulates and Eliminates Odor Molecules

Introducing ODOGard®.

## Odor's Worst Enemy.

Persistent odors can be a thing of the past. Now there's a way to reduce odors with the innovative, patented ODOGard® coating on our filters. ODOGard permanently eliminates odors by creating a covalent bond with malodorous molecules, removing the ability to stink. Once this bond is established it cannot be undone, making it impossible for the odor to return, gone forever. These are the **ONLY** filters that destroy odors at the molecular level. Because if a place smells bad, clean doesn't matter.

**GREENTECH** | Technologies Explained

**PCO** **Photocatalytic Oxidation (PCO)** uses a broad-spectrum UV light and moisture in the air, creating active molecules to seek out and diminish pollutants at the source.

**Bipolar Ionization** creates negative and positive charges that remove dust and other particulates from the breathing space.

Well known high-efficiency particulate arrestance filters, or **HEPA filters**, offer passive filtration, forcing air through fine mesh to trap particles such as pollen, pet dander, dust, and smoke. What makes our filters superior is the patented ODOGard technology, exclusive to Greentech.

**ODOGard®** | Coated Filtration

- **Permanently destroys odors at the molecular level**
- **Natural formulation**
- **Environmentally friendly**
- **Proven non-toxic**
- **Long-lasting effectiveness**
